

MANIKANDAA S

Data Analyst | SQL • Python • Power BI

Tiruchirappalli, Tamil Nadu, India | +91-9445219410 | manikandaa944@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Data Science graduate with hands-on experience in SQL, Python, and Power BI, focused on data cleaning, validation, and business reporting. Built end-to-end dashboards and ETL pipelines translating raw data into decision-ready insights. Completed a government internship analysing structured datasets across 10+ programs at the District Statistical Office, Trichy. Strong statistical foundation (B.Sc. Statistics) and proven ability to meet reporting deadlines while ensuring data accuracy and clear stakeholder communication.

SKILLS

SQL: Joins, CTEs, Window Functions, MySQL
Python: Pandas, NumPy, Data Cleaning & Validation
Power BI: Dashboards, KPI reporting, DAX basics
Excel: Advanced formulas, pivot tables, reporting
Data Analysis: EDA, Statistical Analysis, Data Reconciliation, Source-to-Target Mapping
Other Tools: SPSS, Documentation, Communication, Team Collaboration

EXPERIENCE

Data Science Intern — Analytics Career Connect Jun 2024 – Jul 2024
Remote

- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) on real-world datasets using Python, Pandas, and NumPy.
- Built interactive **Power BI dashboards** to visualize KPIs, trends, and business insights.
- Created data visualizations using Matplotlib to identify trends, patterns, and actionable insights.
- Applied statistical analysis and basic machine learning techniques to analyze datasets and uncover meaningful patterns.
- Developed analytical insights and communicated findings clearly through visualizations and concise reports.
- Prepared analytical reports translating technical findings into stakeholder-ready summaries to support data-driven decision-making.

PROJECTS

Sales Management & Analytics Dashboard (Live) 2026
React · JavaScript · Tailwind CSS · Data Visualization · Vercel

- Built a full-stack, browser-based BI dashboard with CRUD operations, dynamic schema creation, and real-time filtering, enabling end-to-end data management without a backend server.
- Implemented Power BI-inspired KPI cards, bar charts, and trend visualizations, translating raw sales data into decision-ready visual insights.
- Deployed live on Vercel, delivering a production-accessible data product.

Server Monitoring & Performance Data Pipeline 2025
Python · Pandas · Power BI · ETL · Data Engineering

- Designed a complete ETL pipeline to ingest raw server logs, clean missing/inconsistent values, transform metrics, and load results into a structured format.
- Tracked and visualized KPIs (CPU utilization, memory usage, network traffic, server availability) using Power BI dashboards with KPI cards and trend charts.
- Structured the project with modular, reusable Python scripts separating ingestion, transformation, and visualization.

Data Analysis & Reporting Project 2024
Python · Excel · EDA

- Performed exploratory data analysis and transformation on structured datasets using Excel and Python to uncover patterns and support hypothesis generation.
- Conducted quality checks and ensured data accuracy before reporting.
- Generated detailed Excel dashboards and reports visualizing key metrics and trends for stakeholder decision-making.

EDUCATION

Bharathidasan University — M.Sc. Data Science 2024 – 2026
Tiruchirappalli, Tamil Nadu — Relevant coursework: Machine Learning, Deep Learning, Big Data Analytics, Data Mining, NLP, Statistical Computing

St. Joseph's College — B.Sc. Statistics 2021 – 2024
Tiruchirappalli, Tamil Nadu | Grade: 77.32% — Relevant coursework: Probability, Statistical Inference, Operations Research

CERTIFICATIONS

Data Analytics using Python | Power BI – SkillNation | SPSS Certification & Data Mining Workshop | Fundamentals of Python
